service in the Borough of Brooklyn.

Mr. Bossiter said yesterday that the present changes in the operation of the roads under his control would be followed by others, as soon as they can be perfected. Some of the plans, which

He said resterday that the reduction in the num ber of cars and employes on the surface roads, as a result of diverting the traffic to and increasing the service on the clevated lines, would be small, so t will be seen that the accommodations for short distance riders will be greatly increased. It is the intention of the company hereafter to run only the large double truck cars over the Eridge. The decrease in the length of the runs will enable these the traffic at the Bridge loops. The smaller cars will be used as trippers in the suburbs.

After this cars of lines running in parallel directions will use the same loop. Thus the Third, Fifth, Seventh and Flatbush ave lines will use the same track. In this way passengers for a certain part of the city will be bunched together, and many of them will find it convenient to take any one of two or even three lines to reach their destination.
